

E-MOTION

Exclusive comfort through genuine elasticity.

Elegance meets superior functionality
without compromising on well-being.
E-Motion is the Natural Stretch fabrics line for those
looking for wearability on the go and
not giving up on the original qualities of the fibres.

ZIGNONE

Superb performance and a true sense of well-being. Even more dynamism from nature.

E-Motion combines unequalled flexibility and high-quality wools. The combination of technical properties and comfort is due to the Natural Stretch special treatment that offers fabrics elasticity without the use of elastomers. The garments made with E-Motion simultaneously offer superior fit, by adapting to our body movements, and the breathability expected of natural fibres to deliver increasingly advanced professional attire.

TECHNICAL FEATURES

NATURAL STRETCH

A Natural Stretch treatment achieves levels of elasticity similar to fabrics made with Lycra®, while retaining the original qualities and tactile properties of fibres.

BREATHABILITY

E-Motion fabrics retain wool's remarkable hygroscopic and thermo-regulating qualities that retain body heat and disperse moisture outside.

TRAVEL

E-Motion fabrics are perfect for those demanding style and comfort when travelling or on days with many transfers because of their functional features.

E-MOTION

Full traceability guaranteed by Zignone

Our Green Trace symbol guarantees end-to-end product traceability, providing clients with complete supply chain mapping.

Available for retail: labels, clothing tags, storytelling material for showcases.
